Frank is a technology lawyer who focuses on patent law. He has considerable experience in electrical and computer technologies and is adept at viewing industry advances and analyzing implications for clients and the law.

OVERVIEW

Frank Bruno is a technology lawyer who focuses on patent law and has considerable experience in electrical and computer technologies including hardware, software and telecommunications. With a practice concentrating on industries with new developments regularly, Frank is adept at viewing advances in these industries and analyzing implications for clients and the law. He leads a team that monitors and advises on evolutions in the law for numerous verticals across all 50 states including those relating to advertising and license requirements in the technology, gaming, and financial services industries.

Frank is a first-chair patent litigator and has represented patent-holders and defendants in cases involving software, semiconductor designs and methods of manufacture, digital telephony, image compression, and global positioning systems. In addition to his work in federal district courts, he has also successfully represented parties in utility and design patent infringement disputes mediated by Amazon.com.

He has drafted and negotiated patent and software licenses and has represented buyers, sellers, and lenders in corporate transactions, such as acquisitions and financings, where intellectual property was a significant asset.

As a lawyer registered to practice before the U.S. Patent and Trademark Office, Frank has prosecuted patent applications covering a variety of technologies including computer hardware and software, biomedical devices, and vehicle barriers. He has written opinions on patent validity and infringement in matters relating to cellular RF chips, digital storage technology, and consumer electronics.

Clients appreciate Frank's ability to manage large projects, listen to their opinions with respect, and determine ways to achieve their larger goals. His skill at delivering results in a timely and efficient manner has produced outcomes for
